INFORMATION TECHNOLOGY

Information Technology: Systems Development

Build Your Future in Technology.

DURATION	QUALIFICATION	PROGRAMME FEE
12 Months	**National Certificate**	**R18,500**

Programme Overview

Develop foundational knowledge and practical skills in software and systems development. Explore programming concepts, databases, web technologies and problem-solving as you begin your journey into information technology.

Who Should Apply?

- Individuals interested in information technology
- Aspiring software and systems developers
- School leavers exploring technology
- People interested in databases and web technologies
- Learners seeking foundational IT knowledge

What You Will Learn

- ✓ Programming fundamentals
- ✓ Systems development concepts
- ✓ Database fundamentals
- ✓ Software development principles
- ✓ Web technologies
- ✓ Problem-solving techniques
- ✓ IT fundamentals

Why Choose This Programme?

Build technical foundations	Understand core concepts used in systems development.
Explore software development	Learn about principles involved in creating software solutions.
Understand data	Discover how databases organise, store and manage information.
Develop problem-solving	Build an analytical approach to technical challenges.

Entry Requirements

Contact Citrine Institute to confirm current entry requirements, recommended prior knowledge and any required IT experience.
